

Getting started with MyService360

Services management & analytics for IT Infrastructure

Summary tab view in MyService360

Proactively boost IT services health for an entire datacenter or a single Dell system

Our personalized cloud-based dashboard simplifies complex data sets for support and services into actionable intelligence. Move seamlessly from real-time analytics and data visualizations across your complex infrastructure, to online self-service and an end-to-end service history for Dell products. MyService360 helps you identify the priorities and potential risks for services health so you can take the right action, the first time.

MyService360 supports Dell data protection, storage and CI/HCI products. Dell PCs are not supported.

FORRESTER

How to enable your best MyService360 experience

1
Get setup with a **business account**

Create or upgrade to business-level account at Dell.com online support site. To access MyService360, you must first have an online account using a business email domain validated for your enterprise.

Do even more with your business account: Registering once unlocks access to all online support features at [Dell.com/Support](#).

[Learn more and get started now with our step-by-step guide](#)

2
Access **MyService360 for the first time**

Once you receive a confirmation email that your business account setup is complete, sign into MyService360 from the online support site ([Dell.com/support](#)) with your credentials. By default, your MyService360 dashboard opens on the **Summary** tab. Navigate to the **Health & Risk** and **Incident Management** tabs as needed.

Your company administrator determines the information available to you in MyService360 for your company's sites and Dell products. Note: The first employee who registers for a business account in Step 1 is automatically designated as a company administrator.

Under your Company's name in the MyService360 dashboard, you can select **Choose your Sites/Products** to modify your site list by deselecting **Account Sites** from your default list. In addition, you can further refine the data in your MyService360 view by [adding or modifying a Custom Group](#).

3
Connect devices for **effortless support and richer insights**

Connect your eligible Dell systems with services contracts for a richer online experience in MyService360 including automated case creation and analytics-based recommendations. The [secure connect gateway 5.x technology](#) is the next generation consolidated connectivity solution from Dell Technologies Services. It replaces the Legacy Secure Remote Services.
