

INFOGRAPHIC

SaaS platform for data protection and cyber resilience

Protecting data efficiently is an industry-wide challenge

DELL APEX BACKUP SERVICES

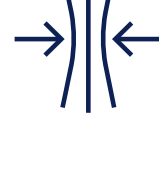

SaaS platform to protect your data wherever it lives

Data protection

Simple, scalable, secure

- Backup and restore
- Disaster recovery
- Archive

Cyber resiliency

Accelerated ransomware recovery

- Air-gapped backups
- Incident response readiness
- At scale recovery

Data governance

Automated, predictive intelligence

- Compliance monitoring
- eDiscovery support
- Federated search

Single console with visibility to all cloud workloads

SaaS Apps

- Microsoft 365
- Google Workspace
- Salesforce

Endpoints

- Laptops
- Desktops

Hybrid Workloads

- Virtualization
- Databases
- NAS
- Cloud-native

Data protection for SaaS apps, endpoints and hybrid workload

Respond to key business initiatives and data growth with agility

Deploy in minutes

Scale on demand

Reduce cost and complexity

DELL APEX BACKUP SERVICES FOR SaaS Apps

Mitigate the risk of data loss, ensure regulatory compliance and improve data visibility

- eDiscovery
- Automated Compliance
- Federated Search

Microsoft 365

Get unified data protection and governance for Microsoft 365 applications (Exchange Online, OneDrive, Teams and SharePoint).

Google Workspace

Obtain secure, scalable, cloud-native backup and disaster recovery for Google Workspace without sacrificing security or compliance.

Salesforce

Achieve complete data protection and address recoverability gaps for Salesforce users with a cloud-native data management solution.

DELL APEX BACKUP SERVICES FOR ENDPOINTS

Centralized, secure protection of your remote business data

With the increase of critical data being stored remotely, it's important to have an endpoint backup plan.

Protect your data no matter where it goes

- Quickly locate lost or stolen devices with geo-tracking
- Rapidly recover entire devices from snapshot

Ransomware recovery

- Identify and automate data protection for key business assets
- Secure data in flight and at rest

Data security and compliance

- Federated search across all backup data
- Automated and proactive compliance monitoring
- Data encrypting at reset and in transit

DELL APEX BACKUP SERVICES FOR HYBRID WORKLOADS

Protect your on-prem and cloud-based workloads directly to the cloud

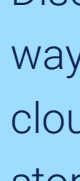

- Long-term Retention
- Reporting
- Storage Insights

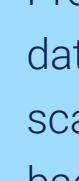

Transform data center backup and disaster recovery for virtual environments (VMware and Hyper-V)

Reduce the cost and complexity of data protection for enterprise databases (Oracle, MS SQL and SAP HANA)

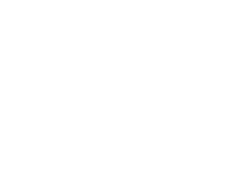

Discover a more cost-efficient way to protect on-premises and cloud based network attached storage devices

Protect your cloud-native workloads from data loss and cyber threats with simple, scalable, snapshot orchestration, air-gapped backup, and disaster recovery

Simple User Experience

Dell APEX Backup Services delivers radically simple data protection as-a-Service enabling your business to simplify your day-to-day by eliminating infrastructure management and ensuring all-in-one secure protection with backup, disaster recovery, and cyber resilience.
