# MYDELL

DELL Technologies

DELL SOFTWARE SOLUTIONS

MyDell is a portal that includes our AI-based optimization software that delivers intelligent features and customizable settings to fine-tune your PC for optimal audio, video, battery life, and overall PC performance. Plus access to software downloads, SupportAssist, product registration and more.

Feature availability varies per Dell PC model and version of MyDell.

MyDell Features:

Network:

- **Simultaneous Data Transfer** utilizes multiple network connections (wired and wireless) to transfer data and improve download speed.
- **Conference Bandwidth Performance** gives maximum bandwidth to the conferencing app (like Zoom or Teams) when in use.
- **Automatic Network Switching** automatically connects to a different network when better performance is available.
- **Optimize Network Traffic** prioritizes which applications receive the most bandwidth when network traffic is congested.

Color & Display:

- **Basic Color Profiles** provide an immersive video experience by selecting from pre-set modes for different video types. Plus controls to adjust contrast, saturation and color temperature.
- **Advanced Color Profiles** add the ability to set a particular color profile to any application so that the screen color changes when you switch from one application to another.
- **Dolby Vision** provides setting options that are optimized for your environment.

Presence Detection:

- **Walk Away Lock** turns off your display when you walk away.
- **Wake On Approach** awakens your PC when it detects your presence (but does not unlock your PC without Windows Hello enabled).
- **Keep Awake** prevents Windows from turning off the display when you are present but not actively engaged with the system.
- **Look Away Detect** dims your PC when you look away from your screen helping protect your privacy and preserve battery.
- **Onlooker Detection** displays an alert when an onlooker is detected and can texturize your screen to help protect on-screen content.

DELLTechnologies

Audio:

- **Background Noise Reduction** uses artificial intelligence to distinguish voice inputs vs. distracting noises and removes background noises during calls and audio recordings. Also includes echo cancellation and reverb removal.
- **Voice Quality Monitoring** notifies you when your voice quality is poor on a call.
- **PC as Bluetooth speaker** streams music through your PC speakers when paired with a Bluetooth enabled device.
- **3D Audio** provides an immersive audio experience – particularly when a movie or music is recorded in 5.1 and 7.1 surround sound.
- **Equalizer** features customizable controls to adjust your preferences.

Power:

- **Dynamic Charge Policy** uses machine learning algorithms to apply the best charge policy based on how you use your PC.
- **ExpressCharge** rapidly charges your battery so you are up and running quickly.
- **Intelligent Battery Extender** takes battery-saving measures to extend battery run time when low.
- **Thermal Management** settings allow you to balance PC performance, fan noise and temperature.
- **Battery Information and Smart Alerts** provides battery health and charging status, time remaining to charge, serial number and more.
- **Peak Shift** allows users to set times of day to charge battery or when to work off the battery to save energy costs.
