Improve security, sustainability, and administrator efficiency with the Dell server management portfolio

vs. comparable tools from HPE

Bolster security with system lockdown in

95% less time & 83% fewer steps

with iDRAC9 vs. iLO 6

Dell offered more robust embedded security features to protect your systems

Limit access and ensure integrity by locking down system configurations and settings quickly and easily.

Optimize energy efficiency with

4x more power management metrics

and 25 customizable reports with OME vs. 0 reports in OneView

Dell offered stronger power management and monitoring features to help track and meet your sustainability goals

OME provides more granular controls (power usage, airflow, carbon emissions, and more) to optimize energy efficiency.

Enhance remote functionality with

16x more remote BIOS features

with 51 in iDRAC9 vs. 3 in iLO 6

Dell offered better flexibility for administrators

iDRAC9 makes remote management easier with more granular control over BIOS configuration settings.

The tools we tested:

	Dell solution	HPE solution
Embedded/remote server management	Dell Technologies Integrated Dell Remote Access Controller 9 (iDRAC9)	HPE Integrated Lights-Out (iLO 6)
One-to-many device management console	Dell Technologies OpenManage™ Enterprise (OME)	HPE OneView
