

# Take a better path to protecting virtualized Microsoft SQL databases.

## Dell PowerProtect Data Manager with Transparent Snapshots

Up to **5x faster** backups<sup>1</sup>

Up to **6x faster** restores<sup>2</sup>

Up to **5x reduction** in VM latency<sup>3</sup>

**FAST**

**EFFICIENT**

Shift into high gear.

**Significantly reduce** server footprint and power consumption

**Zero vProxies** required for data movement

**Live mount databases** from protection storage for no impact to production

**Guaranteed** data reduction<sup>4</sup>

**Hit the cruise control**

**DBA-driven self-service backups**  
Admins can steer database protection using native tools.

**Less pitstops, more open roads**  
Leave latency and application disruption in the rear-view mirror.

**AUTOMATED**

**SIMPLE**

Move into the fast lane.

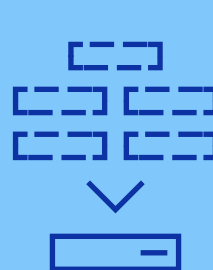

**Single pane of glass management**

**Automated, policy-defined guidelines**  
Monitor, manage and enforce Service Level Objectives (SLOs) for compliance.

**Recovery orchestration**  
Automate restore plans for VMs.

  
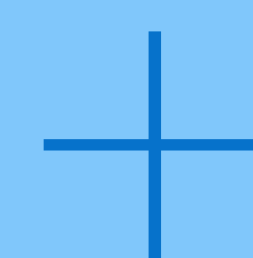

**Cost savings**

  
**Reduced infrastructure**

  
**Energy efficiency**

  
**Near-zero disruption**

# Protect your virtualized SQL databases without compromise.

Dell PowerProtect Data Manager
