Stay connected and productive with Microsoft Teams Meetings

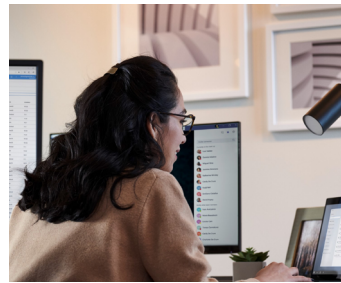

Meetings have always been the cornerstone of teamwork. People who are dependent on each other to achieve shared goals gather to connect, align, and drive progress.

Welcome to meetings made smarter!

Microsoft Teams takes a new approach to meetings, making them more effective by helping to focus everyone's attention and energy.

Stay in the flow before, during and after the meeting

Save time with a smart, simple all-in-one solution

Keep everyone engaged with interactive experiences

Count on enterprise-grade security, quality, and privacy

Dell Technologies Services provides solutions for Microsoft Teams Rooms

Modernize your Meeting Room experience

Create the ultimate hybrid meeting experience with a simple, secure, validated solution for any meeting space.

Elevate your teamwork to the next level — confidently and quickly.

Our Microsoft-certified consultants will help you build a strategy for modern collaboration using Microsoft Teams, speed your adoption of Microsoft Teams Rooms, and maximize the value of your Office 365 investment.

Highlights

Take the first step

The **Dell Technologies Microsoft Teams Rooms Platform Readiness Service** helps customers understand best practices for the configuration of the Microsoft Teams Rooms settings in their Microsoft 365 tenant and determine their overall readiness. This service prepares the Microsoft Teams Rooms deployment with several critical, central tasks within the Microsoft 365 Teams tenant. At the conclusion of this service, a readiness report is delivered; it captures the overall readiness requirements and status of the environment. [Download flyer.](#)

Your Partner for Success. Dell Technologies.

Our solutions and services are designed to make your productivity objectives a reality.

We understand the complexities of deploying Microsoft services and applications, as well as the infrastructure and devices that support them. Dell Technologies is the recipient of 60+ Microsoft Partner of the Year awards and earned Microsoft competencies for our global customer experience deploying Microsoft applications and operating environments.
